Summary:
Followup-To:
Distribution: world
Organization: University of Saskatchewan
Keywords:

This is release V7.02f of the C-BBS packet BBS for the Amiga computer.
I found the problem which was causing compressed files sent to FBB to be garbled
if they were more than about 2Kb long. This release fixes that problem so that
you can now use FBB compression without restriction.
See the directory pub/hamradio on ftp.usask.ca

Is anyone working on a device driver for SVR3.2/4.0 for ax25?? I have
some code written for the sun system (by ve6uug) but it is missing ax.h
and it is a few years old.

Has work on this or other drivers continued?? My main interest is in
a streams device driver and not a hack of ka9q NET/NOS since unix
has all the TCP/IP programs.

Tnx Tom ka9qpg/g7ogu

Has anyone had experience running the latest G8BPQ Code (4.06E?)
with F6FBB BBS s/w version 5.15? If so, any comments?

For the past five or so years I have been using the W0RLI BBS software but
am now researching what else is available. I have FTP'd the latest copies
of F6FBB, W0RLI, and AA4RE and have studied the document files. I would
like to FTP the latest version (1.14?) of MSYS. Can anyone tell me where
to find it?

73,
Carl

I'm looking for a low-cost mac packet station.
I've seen plans in 73 magazine for a low cost mac
software/hardware TNC. It cost about \$30.

Has anyone used such a system on the mac? If so
how did you like it, would you do it again? What
software do you recomend to use? I'm interested
in 2m packet.

Pointers to information are also welcome.

Thanks,
-Jeff

I built a Baycom modem and use it with my Macintosh. The software I
use is a combination of SoftKiss1.6 which converts the Baycom data
to KISS mode, and Net/MAC, the ka9q software for Macintosh. It
works great. Both pieces of software available for ftp on the
network (I think they are on ucsd.edu, someone correct me if
wrong).

To: packet-radio@ucsd.edu

I have a powerbook 100 and an Alinco DJ-F1T. I want to find the
cheapest and smallest method of doing packet I can find. Some soldering is
OK. I am wondering if there is a packet modem that will fit in the modem slot
on my powerbook. If not the smaller the better. Also what kind of software
do I need for Mac Packet and is there Remote Access type software for Packet.

Thanks,

N0TQF
